

Metso:Outotec

Wear parts fastening kit

Application

For NP series
impact crushers

Metso Outotec OEM fastening parts are easy to use and backed by our quality and years of improvements to supply the best fit.

Our OEM fastening parts consistently provide the proper strength to keep wear parts continuously working for maximum production.

Fastening parts offer quality, efficiency and safety

Available parts

- Blow bar fastening package

Quality

Metso Outotec works with quality suppliers to ensure our high standards and strict tolerances are met.

Efficiency

We have identified the important spares to have available for wear part changes. Ease of assembly and disassembly of the main components contribute for reduced downtime.

Safety

To achieve unsurpassed safety, carefully selected materials are used to ensure safety standards are not compromised.

Benefits

- 100 years of equipment expertise
- High kit availability through our global distribution centers
- Maximize production time by reducing unplanned stoppages
- Minimize costs as kits contain the key parts needed

Blow bar fastening package*

- Hammer wedges
- Shims
